Regulator

- Designed For 4-20mA Loop Operation And Energy Scavenging Applications
- Open Frame SMD Design
- -40°C to +105°C Operating Temperature @ Full Load
- Continuous Short Circuit Protection
- No Minimum Load Required
- 5000m Operating Altitude

Description

The R420 has been designed for auxiliary power from 4-20mA loops and other low power budget applications that require a maximum input current <3.6mA. This low profile SMD converter delivers a regulated, short-circuit protected output that can be adjusted between 1.8V and 5V with a single external resistor and delivers three times the output current of equivalent linear regulators to power microprocessors, data-loggers and HART digital modems without affecting the analog 4-20mA signal. The R420 will also find many applications in energy scavenging and indoor solar powered circuits.

Notes:

Note1: Efficiency is tested at 10-36VDC, full load and +25°C ambient. Note2: Max cap load is tested at nominal input and full resistive load.

Model Numbering

Note3: add suffix "-R" for Tape and Reel Packaging
